

My client uses expert knowledge, design, engineering and science to develop innovative packaging technologies. The company is innovation driver in its segment and, thanks to its extensive experience and high level of technological know-how, develops plastic applications and solutions for the cosmetics, household, food and pharmaceutical sectors. We have production facilities in North America, Europe, Asia and South America and over 14,000 dedicated employees in around 20 countries.

Within the pharma unit, the digital healthcare unit develops eDevices and mobile diagnostic tools for various consumer healthcare treatments and for optimal healthcare management.

In this very agile and internationally oriented environment, we have created a new position at our location in the Lake Constance region and are looking for another team member as
